

Capitol Connection Q&A for Contractors
By Shauna Krause, President, Capitol Services, Inc.

To paraphrase, 'it was the BESS of times, and the worst of times.' After six hours in the chair, I can 'put to rest' any ideas that a CSLB meeting leaves you 'bored'. Big news for contractors in the latest Contractor's State License Board meet up... We have received many calls following the most recent CSLB meeting which was held to put to rest the question of the proper classification needed to install Battery Energy Storage Systems, which have become increasingly more essential with the popularity of electric cars and the demand for solar energy systems.

To summarize the outcome of the meeting, the CSLB released an industry bulletin which is condensed below. *Don't forget to contact us if you need further clarification or assistance with obtaining this classification on your license based on their determination.

CSLB Announces Contractor Classifications Authorized to Install Battery Energy Storage Systems

On July 27, 2021, the Contractors State License Board (CSLB or Board) held a public meeting to review, discuss, and take action on the June 30, 2021 [Battery Energy Storage Systems License Classification Report](#) issued by the University of California (UC) Berkeley. As part of the public meeting and consistent with Open Meeting Act requirements, the Board afforded members of the public an opportunity to comment on UC Berkeley's report prior to taking any action.

In response to the data compiled in the report by UC Berkeley as to the appropriate classification to install Battery Energy Storage Systems (BESS), the Board motioned and voted by majority decision, to take the following actions:

- Accept the UC Berkeley recommendation to preclude the "C-46" Solar license classification from installing BESS.
- Rescind all prior staff opinions that BESS can be installed by a "C-46" Solar license classification as "incidental and supplemental" work when the BESS is paired with a solar photovoltaic (PV) system. You may find the regulatory definition of incidental and supplemental [here](#).
- Provide a 90-day grace period to educate the industry on the Board's decision to adopt UC Berkeley's recommendation to preclude the "C-46" Solar license from BESS installation and assist "C-46" Solar contractors in obtaining a "C-10" Electrical classification. As highlighted in the report, there are currently 447 dual "C-10" and "C-46" license holders.
- The Board's July 27, 2021, decision does not impact the "A" General Engineering Contractor, "B" General Building Contractor or "C-10" Electrical Contractor to install BESS with their respective classifications.
- Board staff will provide an expedited review of any existing "C-46" contractor application seeking to add a "C-10" classification if the Board receives *the application no later than November 1, 2021*.
- CSLB will not take any retroactive enforcement action against a licensee as a result of the Board's July 27, 2021, decision to rescind all prior staff opinions concerning incidental and supplemental work performed by a "C-46" Solar license. *Any enforcement action will be prospective, effective November 1, 2021*. Projects entered into after this date will be subject to the electrician certification requirement unless such work is statutorily exempted under Labor Code sections 108 or 108.2.

While knowledge is power, knowing where to go for the answers is half the battle. Get expert assistance immediately when you call 866-443-0657, email info@cutredtape.com, or write us at Capitol Services, Inc., 3609 Bradshaw Rd, Ste H, #343, Sacramento, CA 95827. Search past column at www.cutredtape.com.

The background of the image is a close-up, slightly blurred view of the American flag. The blue field with white stars is on the left, and the red and white stripes are on the right. The text is overlaid on this background.

**The NCCA Office will be closed
Monday Sept. 6th in honor of
Labor Day!**

**We will re-open Tuesday, our
regular business hours.**

REFER A MEMBER & YOU CAN WIN!

REFER A NEW MEMBER AND YOU COULD WIN A \$100 GIFT CARD TO A LOCAL RESTAURANT. ALL CURRENT NCCA MEMBERS WHO REFER A NEW MEMBER TO JOIN THE NCCA BY TUESDAY, AUGUST 31, 2021 WILL BE ENTERED INTO A DRAWING TO WIN. WHEN YOU WIN, SO DOES YOUR NEW MEMBER! YOU BOTH COULD WIN A \$100 GIFT CARD. THE NEW MEMBER MUST JOIN AND PAY BY AUGUST 31, 2021.

ASPHALT PAVING MACHINE SAFETY

INTRODUCTION

Building or repairing a paved road requires a few different pieces of equipment, an asphalt paving machine being one of them. This machine smoothly spreads asphalt onto a prepared street or roadway and is followed by a roller. Following the safe work practices presented in this lesson will help ensure employee safety.

HAZARDS

Asphalt paving machines move very slowly; however, they can be very dangerous. Employees should be aware of the following hazards:

- Burns from hot asphalt
- Complications due to asphalt fumes, which may include:
 - Coughing
 - Wheezing
 - Shortness of breath
 - Headaches
 - Dizziness
 - Vomiting
 - Bronchitis
- Being struck by the machine
- Slipping off the truck
- Damage to equipment due to running over manholes/sewage covers
- Collisions with other vehicles
- Pinch points

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Employees should wear the appropriate personal protective equipment (PPE). This may include:

- Hard hat
- High-visibility Safety vest
- Boots
- Gloves
- Respirator

MAINTENANCE

In order to operate properly, asphalt paving machines should be inspected and maintained according to the manufacturer's instructions:

Daily Maintenance

When performing daily inspection, employees should do the following:

- Inspect for damage or excessively worn parts.
- Clean the machine at the end of each use.
- Lubricate moving parts.
- Ensure that the fuel tank is full.

ASPHALT PAVING MACHINE SAFETY

Weekly Maintenance

When performing weekly inspection, employees should do the following:

- Lubricate fittings.
- Inspect air filters.
- Tighten auger motor chains.

Monthly Maintenance

When performing monthly inspection, employees should do the following:

- Change the engine oil according to the manufacturer's instructions.

SAFE WORK PRACTICES

When operating or working around an asphalt paver, employees should do the following:

- Only authorized and designated employees should operate the machine.
- Ensure all manufacturer's instructions for inspection and maintenance are completed before use.
- Do NOT operate damaged or malfunctioning equipment. Report any damage or excessive wear to your supervisor.
- Ensure that all manufacturer's instructions are followed during operation.
- Ensure that roads are blocked off before street work begins.
- Be aware of any passing vehicle traffic.
- Ensure there are no obstructions in front of the paving machine during operation.
- Do NOT walk between the paving machine and dump truck.
- Ensure all employees are notified of verbal communication methods and hand signals that will be used between operators and flaggers.
- Always follow flagger instructions, whether they be hand signals or paddles.
- Ensure there are spotters along the machine to watch for people, power lines, or other obstructions.
- Repairs should NOT be made unless proper lockout-tagout procedures have been completed.

CONCLUSION

An asphalt paving machine is a very useful piece of equipment in the process of paving a road. By following the safe work practices presented in this lesson, employees can help minimize the chances of an accident occurring when operating or working around an asphalt paver.
